**Past Issues**

completing the engine break-in on the 182. It's currently hanging out in hangar bay #6.

Be very careful moving this aircraft, it's a tight fit!

[182 movement details](#) in case you missed them.

Remember that we don't need to fill this aircraft up to the top with fuel. The fuel tends to expand and drip.

---

## Maintenance Officers

Mike B will be taking over the MO duties for N734RQ. Avram S will be moving over to MO for the 182.

**Thanks Mike and Avram!**

# Hangar Repair

Our contractor Dave has begun repairs. He will spend about 2 weeks per bay on posts then move onto repairing the aprons.

Please be careful while moving through the hangar, it's going to be a construction zone all summer!

## VOR Checks

If you are expecting to fly into actual IMC conditions, make sure you check the logbook for the last VOR check.

The VOR receiver must be checked within the preceding 30 days for an IFR flight (14 CFR 91.171).

We seem to be out of the habit of checking these monthly since so much of our flying is for currency using GPS.

## Bug season!

Remember to clean off those bugs from the leading edges and windscreens. If the water bottles are low please refill them, water with a few drops of Dawn soap does the trick.

## Mat T

We have another instrument-rated pilot at Flywell. It was a long journey of reschedules and continuations but Mat persisted!

**Congrats Mat!**

## Flywell CFIs

available to fly! Many of us need currency flights in the 182. Maybe you want to get checked out in the 182 or Lance. Or you want to sharpen up some skills!
